"OUR APPROACH TO SUSTAINABLE DESIGN – TAKE ADVANTAGE OF WHAT IS READILY AVAILABLE
AND

EXPLORE WHAT IS PRACTICALLY ACHIEVABLE...."

Sustainable Development is the development that meets the needs of the present without compromising the ability of the future generations to meet their needs. And to achieve this goal, the systematic integration of Science and Maths play a pivotal role. Therefore, our School is organizing the Science and Maths Week 2018 from 30th July to 3rd August 2018. Students will be provided with a platform where they'll learn through observation and share their own inputs in achieving the goals for the future in a sustainable manner. We solicit your cooperation and help in receiving maximum participation from our future budding scientists and mathematicians.
